PROJECTS

ProfMatchAI, 1st Prize, Collège La Cité Computer Science Challenge 2026 | [GitHub](#)

- Develop a platform that assigns professors to courses, producing a compatibility score and a natural language justification for every assignment.
- Design a two-tier matching engine: a self-contained deterministic algorithm, enriched by a language model when available.
- Collaborate in a team of four, two on development and two on AI, using Next.js, Express 5, Prisma, FastAPI and Python.

Hednai, Maritime Software | hednai.com

2025 - Present

- Develop and deploy the brand website in React, TypeScript and Vite: bilingual interface, Express 5 and Prisma backend on PostgreSQL, GitHub Actions CI.
- Design FleetLog, an offline-first fleet management application for small shipping companies: Electron, React, Drizzle and SQLite, Prisma and PostgreSQL sync.
- Build RadioCom, a VHF communication simulator based on the IMO Standard Marine Communication Phrases.

Karibou Market, online marketplace (capstone project, Collège La Cité) | [GitHub](#) · [Live demo](#)

- Build a marketplace for African grocery stores in the Ottawa-Gatineau area: user role management, JWT authentication, Redis caching.
- Base the application on Next.js, Express 5, MongoDB and Cloudinary, with Cypress end-to-end tests wired into the CI pipeline.

Other academic projects

- [ModeNova-Live demo](#), [The Maritime Driller-Play](#), BiblioKowazo, GéoSpot, RefugeAnimo and AutoVitrine: .NET MAUI / C#, SwiftUI and Kotlin applications.
